

## DAWN FARMS / TMI SUSTAINABLE SOY POLICY

Dawn Farms Group recognises the importance of the responsible sourcing of raw materials and the potential impact of deforestation and conversion of ecosystems on the wider environment.

Dawn Farms Group have signed up to the UK Soy Manifesto as TMI Foods, a Dawn Farms Company. We commit to the removal of the practices of deforestation and the conversion of other natural ecosystems from soy supply chains for all products sold in the UK market as soon as possible and no later than the end of 2025. The cut-off date for deforestation and conversion will be as required by the UK Soy Manifesto.

### **COMMITMENTS AND REQUIREMENT:**

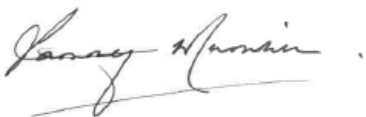

- Applies to all soy in the supply chain, whether used directly as an ingredient or embedded in other raw materials, for example animal feed.
- Encompasses both legal and illegal conversion, as defined by the Accountability Framework initiative (Afi).

Dawn Farms Group also commits to working with our direct suppliers to ensure they adopt and cascade the same commitment through the supply chain and to integrate the UK Soy Manifesto commitments, while also aligning with the European Union Deforestation Regulation (EUDR), within the relevant commercial contractual requirements.

### **ACTION PLAN AND GOVERNANCE:**

A publicly available action plan will be developed to ensure that the soy supply chain meets this requirement as soon as possible, but no later than 2025. TMI Foods will publish publicly available progress reports, at least annually, in order to be fully transparent in this area.

Dawn Farms Group is committed to meeting the obligations set forth by the EUDR. With the enforcement deadline set for December 2024, we are proactively working to ensure compliance with the regulation's legality, sustainability, and due diligence requirements. Our commitment extends beyond adherence; we are dedicated to fostering a deforestation-free supply chain ahead of regulatory timelines. Through continuous risk assessment, transparent raw material sourcing, and robust monitoring mechanisms, Dawn Farms seeks to contribute to the broader European effort in combating deforestation and promoting sustainable practices.
